

ORA, YOUR PARTNER FOR
PACKAGING, CLOSING & SEALING

RANGE

The plastic-free packaging solution that keeps
linen and garment clean and looking their best.

Offering tailored solutions to each application/need

Our sealers, specially designed for PakinPap' paper, **meet the needs of professionals** in the dry-cleaning, laundry, hospitality and garment manufacturing sectors.

Combined with technical support and specialised consumables, they offer a comprehensive solution for environmentally responsible packaging that showcases and protects the work carried out at earlier stages.

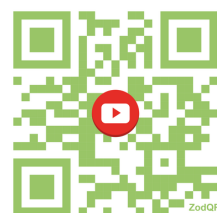

L SEALERS - for folded linen and garment PP 5060 M / PP 5060 L / PP 6080 XL

- For the production of closed packages with maximum dimensions of 50 x 60 cm or 60 x 80 cm (depending on the model).
- Use of 600 mm or 800 mm width (on PP 6080 XL only) split sleeve.
- Options : pneumatic closure, electrically adjustable motorised feet, outlet conveyor, motorised ejection conveyor with PVC belt, silent mobile compressor.

PP 5060 M
with pneumatic closure
and electrically adjustable
motorised feet

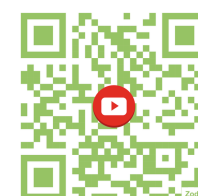

PP 5060 L
with pneumatic closure
and electrically adjustable
motorised feet

VALUATION

Brand image

“ Your brand,
at the heart of
every package

The PakinPap' innovation:

the eco-friendly solution that rethinks linen and garment packaging.

ADDRESSING THE SPECIFIC CHALLENGES OF YOUR FIELD:

- ✓ Reduce the environmental footprint of your packaging
- ✓ Protect clean linen and garments during transport, storage, etc.
- ✓ Showcase your work to your customers
- ✓ Contributes to your company's CSR strategy
- ✓ Promote your brand, your company name
- ✓ Anticipate more restrictive future legislation

THINK TODAY,
PLAN FOR
TOMORROW

PakinPap' : unique papers

No plastic liner

Although they do not have a plastic liner, they can be heat-sealed thanks to the mixture of wax and natural glue with which they are coated.

A patented innovation

No other paper that is currently available is as light and heat-sealable as this. That is why the manufacturer has patented it.

Recyclables

Sourced from PEFC-certified forests, their recyclability within the paper and board industry has been validated by the Centro Qualità Carta (Italy), in accordance with the 'CEPI Recyclability Laboratory Test Method Ver. 3 (2025)'.

PEFC

Breathable and translucent

Their porosity allows humidity from laundry care to escape, and they are translucent enough to identify the garment packed with.

Why choose ORA ?

By placing your trust in us, you are relying on **the experience of a French designer-manufacturer** that has been offering a wide range of packaging solutions for flexible materials **since 1988**.

We affirm our **commitment to limiting the use of plastic packaging**, which has a harmful impact on the planet, by developing a **sustainable solution** based on a natural and renewable resource : wood, sourced from PEFC-certified sustainable forests.

The PakinPap' concept is much more than just a new way of packaging; **it is an environmentally friendly alternative** that is **part of a circular economy approach**.

"PakinPap', the solution developed by ORA set to become the new standard in textile packaging."
